

LED Head Light

LED

Head Light

Based on experienced demands for sufficient illumination during medical procedures as well as other delicate tasks Digitale Photographie GmbH developed the outstanding "videns SuperBright LED" head light. Avoiding unwanted color wavelengths like blue and red, the "videns SuperBright LED" provides daylight with 5.500k color temperature.

The advantages of this new LED Technology:

*perfect extreme bright illumination;
homogeneous throughout the whole visual
field of the loupes*

*high efficiency; 5.500k Color Temperature
with only 3 watts LED - this results in no heat
at the body surface of the LED head light*

*extreme long-life usage of both the LED and
also the rechargeable battery*

*minimum 10 hrs. electronically controlled
full illumination power*

Quality & Flexibility:

Features:

- 3 Watt / 20'000 lux / 5.500 k
- extreme long life
- Ø 2.1 mm HiFlex cable
- extreme light weight, 12 grams only
- height adjustable
- **Options:** Universal Adaptor & CCD Camera

Function:

- Rechargeable battery lasts 10 hrs.
- electronic charging control
- no heat at the LED

Ergonomics:

- perfect, bright illumination
- homogeneous, red-free light
- no shadows in the illumination area

LED Head Light:

- for videns loupes
- Universal adaptor usable with other brands
- CCD Camera adaptor

Handmade in Switzerland
